CHRISTOPHER LAUBENTHAL

Data Design Manager

Christopher Laubenthal is the Data Design Manager at The DeBruce Foundation where he helps to foster change through the visualization of data. He believes that well designed data can spark action. Mr. Laubenthal also acts as a data advisory board member, a public speaker, a mentor and is considered an expert in this developing field.

Prior to joining The DeBruce Foundation, Mr. Laubenthal fostered change at Lockton Companies, LLC, by generating enterprise-scale reporting, educational programs, as well as design templates. His most recognized work is EdWise—a retired, data tool—that was used by the public, elected officials, and received industry recognition. He worked to create this tool while at the Ewing Marion Kauffman Foundation.

Mr. Laubenthal holds a Bachelor's in Political Science from The College of Wooster and a Master's in Public Administration from The Ohio State University.
