TIP
#2

Make a Running Resumé

Pull from those experiences to create specific resúmes for job openings

Keep a resumé with everything you've ever done.

As you complete an experience, document it with Agility Language so it's easy to pull from later.

The sooner you do it, the more likely you won't forget any experiences.

Keep the resumé **short, concise, and meaningful**

Get their attention in **30 seconds**
Choose experiences that have grown the skills used in that job

TIP
#3

Use Job Description Language

Layer in the same language used in the job description to get past Artificial Intelligence (AI) software.

- Some companies will filter through resumés using AI that identifies similar language between your resumé and the job description.
- If you don't change the language, the software won't identify it as a top candidate, even if you're a good fit for the role.

Example: Job Description
