

REES ALENA

Senior Technical Solutions Consultant

At The DeBruce Foundation, Rees Alena brings a practical, solutions-oriented mindset to his role as Senior Technical Solutions Consultant. A full-stack developer by trade, Rees focuses on turning business needs into tangible, user-facing digital solutions that are intuitive, reliable, and built with real people in mind. He believes the best technical solutions come from clarity, adaptability, and a deep understanding of how users interact with technology.

Before stepping into his current role, Rees worked in e-commerce development, building and maintaining backend systems while also delivering user-facing websites and applications that supported real-world business operations. He's known for navigating complex challenges, identifying a clear path forward, and helping translate ideas into effective digital outcomes.

Rees thrives at the intersection of technology, creativity, and communication. A Kansas City area native, he draws inspiration from the city's creative energy. Above all, Rees is motivated by being of service to others and takes pride in building solutions that genuinely make a difference.
